### WORK EXPERIENCE

**Mobile Developer, Banco do Brasil** - September/2013 - present - Brasília, DF

*Banco do Brasil it is the biggest federal bank in Brazil. We deliver banking products and solutions to all the country. We have more than 13 million Android active users on the main application off the bank.*

- Developed & maintained the main application of Banco do Brasil, which is the main interaction channel of our clients.
- Created a chat bot and dashboard app to help farmers in Brazil to take better decisions with more complex information delivered in a simple way, giving them insights about market and crop cares. Used Kotlin to develop the android App, react native for iOS app, nodeJs for the backend and DialogFlow for the chatbot intelligence.
- This project was a internal startup program of the bank where they selected one idea and 5 people to go to silicon valley and create the MVP and try to sell the product to the Board in 3 months. Responsible for the development of the mobile app, and helped to create the architecture of the backend and our servers on AWS.
- Worked in many inside projects, working with a lot of different technologies, because of my skills in learning new technologies and designing solutions for problems.
- Created the main channel for communication between client and their account managers. Created the app Agrobot for farmers in Brazil.
